

Davis

Campus Solar Power Plant

- Deliver up to 14 megawatts of electricity from ground-mounted solar photovoltaic (PV) system.
- Responds to need to decrease long-term utility costs and to reduce greenhouse gas (GHG) emissions to help meet the benchmarks in the University of California Sustainable Practices Policy.
- To be located on 70 acres on the south east corner of the campus (undeveloped land).
- Delivery via third party partnership and power purchase agreement with developer.

Budget Approval

Budget Year 2013-14
