

Solar Farm

- Provides 3-6 MW of power to address UCR's on-site renewable energy production and GHG reduction needs
- Installation involves arrays of photovoltaic panels over 11 acres. Requires an LRDP amendment.
- Addresses UC/UCR sustainability and AB32 policy compliance objectives as well as cost effective energy to UCR.
- Transaction will be through a real estate license agreement with a 3rd party.
- "Funding" will be via a 20-year power purchase agreement.
