UC QUICK FACTS

THE UNIVERSITY OF CALIFORNIA IS
- 238,686 students (nine out of 10 UC students are California residents, including 92 percent of undergraduates)
- 190,000 employees, one of the largest employers in the state; one in 46 jobs in California supported by UC operations and spending by faculty, staff, students and retirees
- 50,000 living retirees
- 1.7 million living alumni

UC OPERATES
- 10 campuses, five medical centers, four law schools, six business schools and 16 health professional schools; California’s only public veterinary school; and the Agriculture & Natural Resources programs statewide, including 4-H which serves more than 130,000 youth
- UC’s continuing education program is the largest in the nation, enrolling 300,000 Californians in almost 20,000 different courses, programs, seminars, conferences, and field studies

UC CONFERES
- 60,000 degrees annually, including more than 45,000 bachelor’s degrees, and 7 percent of all Ph.D.s in the nation

FINANCES
- UC’s budget totals $24.1 billion; approximately 36 percent, $8.1 billion, comes from the federal government
- UC generates $46.3 billion in annual California economic activity and contributes $32.8 billion to the gross state product

FINANCIAL AID
- 69 percent of students receive financial aid totaling $2.3 billion, including $1.2 billion in federal aid
- Nearly 75,000 UC students receive Pell Grants, totaling $336.2 million a year

RESEARCH
- In FY 2012, UC researchers were awarded $3.1 billion in federal research grant funding. Roughly two-thirds of UC’s research is supported through federal funds
- For the past 19 years, UC has led the nation in developing patents; its faculty and graduates, on average, produce nearly five inventions a day and are responsible for more than 4,118 active inventions

HEALTH CARE
- UC runs the nation’s largest health sciences training program with more than 14,000 students
- UC hospitals and clinics handle more than 3.9 million outpatient visits, 290,000 emergency room visits and 144,000 inpatient admissions each year, including a high proportion of the state’s uninsured, low-income, medically vulnerable patients
