

**Bellevue Roadway and Intersection Improvements**

- Creates a primary road access to the campus that would be used by students, faculty, staff and visitors
- This would shift the existing traffic away from the Ranchers Road entrance, which would be mainly used by service, bus and emergency vehicles.
- Provides a secondary ingress/egress pathway to the campus in the event of an emergency or disaster.
- Increases campus safety by reducing vehicular and pedestrian traffic conflicts throughout the academic core.
- Improves storm water management in the north campus (academic core).

**Budget Approval**

Budget Year	2013-14
