

Interstate 5 / Gilman Bridge

- Project realigns Gilman Drive on the west campus and constructs a bridge across Interstate 5, linking to the East Campus Medical Center Drive loop road; expands utility connections to provide system improvements and redundancy.
- Interstate 5 freeway divides campus in a north-south direction, with approximately two-thirds of campus development on the west side and one-third on the east.
- With significant development on the east campus, pedestrian and vehicular traffic between the west and east campuses is increasing; the only current options for travel are public streets and one campus crossing (Voigt Bridge).
- A secondary crossing will alleviate traffic on the existing public and campus roads and provide a closer connection between Health Sciences facilities located on both sides of the freeway.
