

Corporate Overview

Our Background

Founded in 2003

CynergisTek has been providing services to our clients since mid-2003, but many of our clients have been with one or both of the founders since well before the company was founded.

Consulting Services

CynergisTek provides consulting services and solutions around information security, privacy, IT architecture, and audit with specific focus on regulatory compliance in healthcare.

Synergistic

The name “CynergisTek” came from the synergy realized by combining the expertise of the two co-founders – building scalable, mature information security programs and architecting enterprise technical solutions.

Securing the Mission of Care

CynergisTek Services are specifically geared to address the needs of the healthcare community including providers, payers, and their business associates who provide services into those entities.

Our Biggest Asset – Our People

Learned

On average our consultants have 15 years of experience in IT, system administration, management, consulting, audit, information security, privacy and regulatory compliance. Our consultants come from government, military, technology, finance, education, energy, healthcare and security backgrounds. All either have or are pursuing bachelors and masters degrees.

Accredited

A sampling of certifications include CISSP, HCISPP, CISM, CISA, CRISC, CGEIT, CBCP, CCIE, CCNP/CCDP, CCNA/CCDA, SCNA, SCSA, C|EH, ISSAP, ISSPM, CIPP, GSLC, GPEN, MCTS, AICPA. Most of our consultants hold credentials that span multiple areas of focus.

SMEs

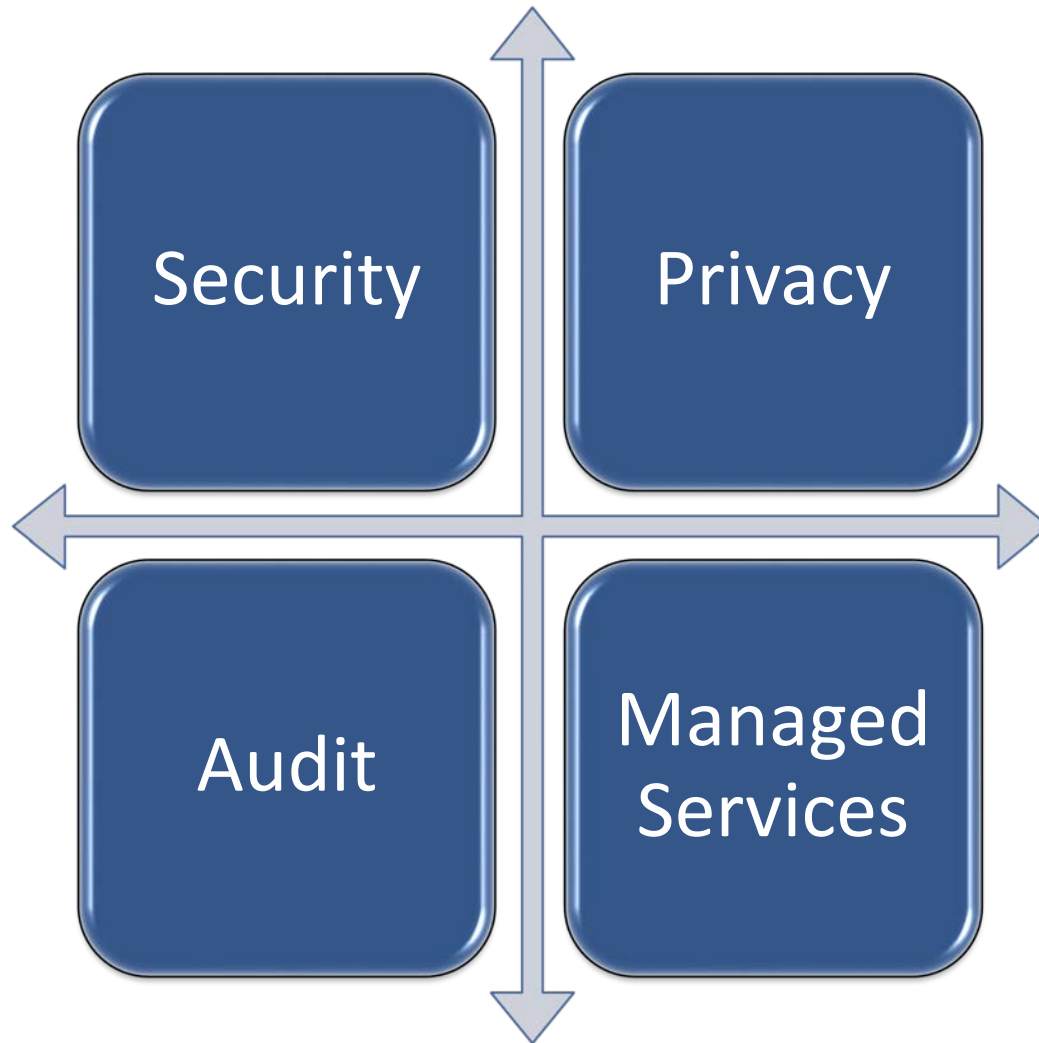

Both the company and our people speak and understand healthcare. Many of our consultants have served in healthcare privacy and security positions. Our business is specifically tailored to serve and focused on healthcare.

Thought Leaders

CynergisTek participates in several industry associations such as HIMSS, AHIMA, HFMA, HCCA, CHIME, IAPP, AHLA, and AHIA. Our thought leadership is continuously on display through regular contributions to healthcare publications, frequent presentations at association conferences and our own quarterly regional events.

How We Are Organized

Our Focus Areas

Regulatory Compliance

CynergisTek maintains very strong relationships with regulatory agencies that set standards and issue guidelines that affect the industry. This allows us to stay abreast of what affects our clients.

Technical Controls Tool Selection

CynergisTek's team of experts help clients select what are the best technical control tools that will be of most value to their security and privacy program and assist with optimization of processes.

IT Architecture

An IT architecture assessment identifies the maturity of various components of an enterprise's information security program. It is the foundation to an overall strong and effective security program.

Program Building

CynergisTek helps organizations design and build effective security and privacy programs. We offer several different services to identify vulnerabilities and help remediate gaps.

Audit Services

CynergisTek offers several different audit services designed to verify and validate security and privacy programs, improve audit readiness and enhance risk management programs.

Strategic Planning

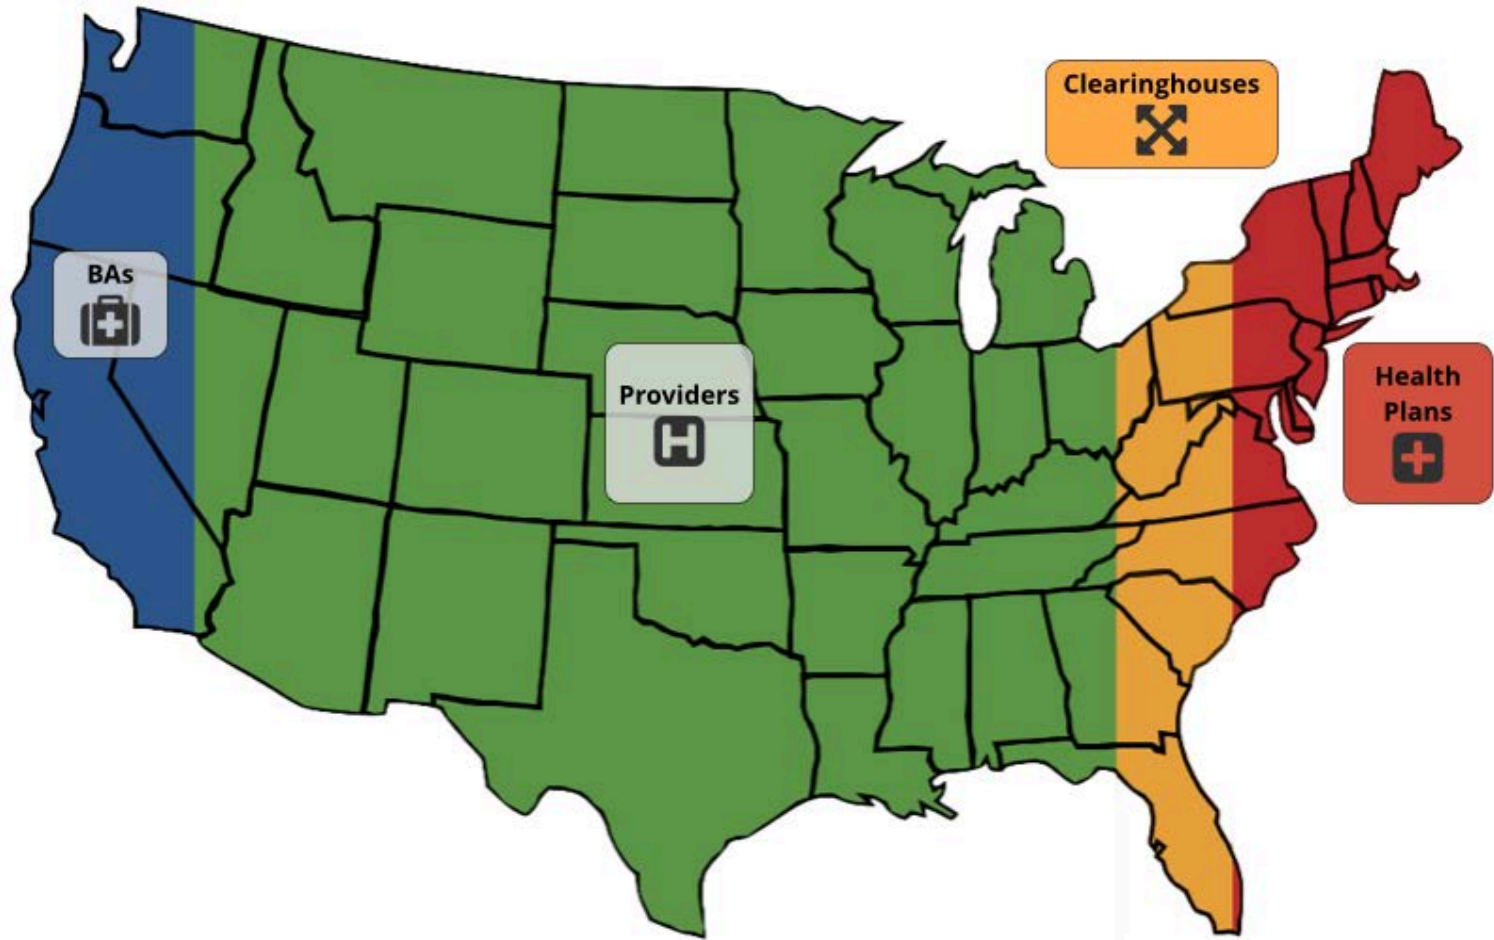

CynergisTek can help organizations with IT plans and goals around privacy and security. We will help identify what your organization needs to implement to improve security, privacy and compliance.
