

Lead **strategic planning efforts** that expand the reach of the UC and campuses as global institutions.

a >>>

SIOs work with key campus leaders to expand their campus and UC's reach as a global university. This is done by working closely with the campus Provost and Chancellor as part of campus long-range development and Strategic Plans.

b

c

d

Stimulate and facilitate collaborative research and international partnerships across the UC system, to address **global challenges**.

a

b 

c

d

SIOs stimulate strategic collaborative and translational research to address global challenges and social and economic inequities in order to generate impactful policies and practices.

Track and advise on emerging **global issues**.

SIOs are apprised of global concerns affecting higher education via a variety of governmental and non-governmental sources, such as the US State Department, international organizations, partner institutions, and local international communities. This engagement gives SIOs essential means to inform and provide guidance to their campuses and the University.

a

d

Manage relevant **data** for the University's global and international activities.

SIOs compile and manage data that document UC's international activities such as study-abroad, international students, international collaborations, foreign delegations, etc., to inform strategies and decisions on the university's global engagement.
