

What's the Point of Sharing?

Learn How SharePoint Can Streamline Work
UCOP's SharePoint Portal

Presenter: Hank Moreira
SharePoint Business Analyst

In a Nutshell

sharepoint in a nutshell

SharePoint provides business collaboration tools that overcome the issues inherent with collaborating via email attachments on content residing on desktops and file shares.

What is SharePoint?

Web-based Microsoft application that provides:

- Team collaboration sites and tools
- Robust document management
- Secured access to content
- Integration with Microsoft Office
- Business Intelligence capabilities
- Workflows & custom application development

UCOP's SharePoint Widely Used & Easily Accessible

- 50 Site Collections containing 2,200 sites
- 850,000 files & 300 GB of data
- All UCOP employees & 4,500 Campus users
- Available to all UCOP and UC employees with commonly used IDs and passwords
- Accessible from any Internet-connected device; 24x7x365

Broad Range of UCOP Uses

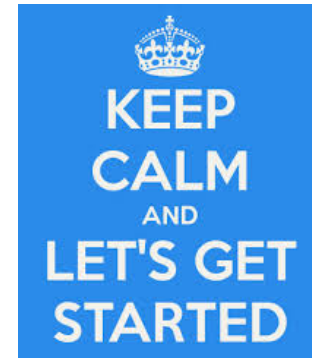

- Department & Team Collaboration Sites
- Project Management – IT PMO & UCPath
- UCOP HR On-Boarding and Off-Boarding
- General Counsel Content Management
- Compliance Policy Administration System
- BRC Signature Authority Transformation

SharePoint Support
