PI Name		Campus	Project Title
Lia	Scott	UCB	Building a geographically diverse cohort to examine the multilevel effect of racism on breast cancer
Chang-il	Hwang	UCD	*Targeting p300/CBP to inactivate cancer-associated fibroblasts in pancreatic cancer
Guodong	Zhang	UCD	Prostaglandin-metabolizing microbial enzymes as novel target of colorectal cancer
Christopher	Fraser	UCD	Kinase-Ribosome Interactions: A New Strategy to Target mRNA Translation Dysregulation in Cancer
Richard	McKenney	UCD	*Reconstitution of the molecular forces necessary for mitotic spindle bipolarity
Surbhi	Singhal	UCD	*Interrogating an ERK Activity Signature in Non-Small Cell Lung Cancer
Jacqueline	Kim	UCI	*Refinement and usability of e-support for pancreatic cancer patients
Thomas	Martinez	UCI	Illuminating PDAC's Dark Proteome to Reveal New Vulnerabilities
Pablo	Lara Gonzalez	UCI	Elucidating the role of cyclin B3 in cancer cell mitosis.
Stanley	Ng	UCI	Machine learning enabled deconstruction of malignant potential at clonal resolution
Yu	Huang	UCLA	Deciphering the bioelectrical signatures of cancer cells
Qibing	Pei	UCLA	Synthesis of Nanocomposite Scintillators
Jennifer	Manilay	UCM	*Impact of Pesticide Exposure on Hematopoietic Stem Cells and Cancer
Huimin	Zhang	UCR	Antigen-Specific Strategies for Reinvigorating Exhausted T Cells
Marley	Dewey	UCSB	Investigating the role of tissue-derived extracellular vesicles in cancer origin and progression
Corina	Antal	UCSD	*Altering germline BRCA2 mutant RNA to restore protein function
Irina	Kufareva	UCSD	*AI-powered discovery of inhibitors for the orphan GPCR BB3, a new target in lung adenocarcinoma

*Projects involving recipients of Disparities in Cancer Research Traineeship Supplements.
See page 2 for more details.
