

This document reflects the result of analyses, discussions and review by UCOP staff and PricewaterhouseCoopers (PwC) to date. The document is subject to change pending additional discussions with PwC however, it represents the best information available to date.

**University of California
GASB 35 Depreciation Reporting**

**Addendum E to
Issues Resolution Memo No. 1**

Consistency in Calculation Methodology – Depreciation of Buildings

This addendum finalizes the University-wide definition of “laboratory buildings” based on Room Use Codes and Program Codes. It also establishes additional campus-specific criteria for the definition of “laboratory” buildings. In addition, this addendum provides further clarification to items previously discussed in Issues Resolution Memo (IRM) No. 1, and subsequent addenda A through D.

Definition of Laboratory Space and Laboratory Buildings

The following tables list the Room Use and Program codes that will be used to identify “laboratory” space. Rooms with the listed Room Use Codes with the listed Program Codes will be classified as “laboratory” space. To be considered a “laboratory” building, the building must meet the following standards:

- At least 25 percent of the total assignable square feet within the building must be “laboratory” space; or
- The building must contain at least 7500 assignable square feet of “laboratory” space.

Room Use Code	Room Use Code Description	Campus Code Applicable To
210	Research Laboratory or Studio	ALL
225	Research Laboratory or Studio Services	ALL
260	Class Laboratory	ALL
261	Special Class laboratory	ALL
265	Class Laboratory Services	ALL
270	Open Laboratory	ALL
275	Open Laboratory Service	ALL

1305, 2305, 3305	Pharmacy	ALL
1306, 2306, 3306	Public Health	ALL
1307, 2307, 3307	Optometry	ALL
3400	Agricultural Field Stations	ALL
3500	Natural Reserve System	ALL
5501, 5502, 5503	Vivaria	ALL
113001	Multi/Interdisciplinary Studies: Biological and Physical Sciences ⁺	ALL
113011	Multi/Interdisciplinary Studies: Environmental Science ⁺	ALL
113012	Multi/Interdisciplinary Studies: Environmental Studies ⁺	ALL

⁺ The specific disciplines will be identified through the Facility Department codes.

In addition, the following codes will be incorporated into campus-specific definitions for determining “laboratory” space :

Program Codes	Program Codes (Disciplines) Descriptions	Campus Code Applicable To
1142, 2142, 3142	Psychology	BK and RV
2130	Multi/Interdisciplinary Studies: ANACHEM ⁺⁺	RV
230900	General and Unclassified Health Sciences: Jerry Lewis Neuromuscular Research Center ⁺⁺	LA
3130	Multi/Interdisciplinary Studies ⁺⁺	BK, LA, SD, and SB

⁺⁺ The specific disciplines or unit will be identified through the Facility Department codes.

Using the definition described above (Room Use Codes, Program Codes, and, where necessary, Facilities Department Codes), OP has developed a list of “laboratory” buildings for each campus based on FY 1999-2000 data. The lists are included as attachments to this Addendum. Campuses are asked to review the list and respond to UCOP by November 30, 2000.

When the Useful Life of an Annual Increment is Determined

The useful life of an annual increment is determined in the year of capitalization. Once the useful life is determined, it is not changed in subsequent years. Modifications or additions may change a building’s classification (e.g., from a “laboratory” building to “other”) and may affect the life assigned to the new increment. However, the life based on the “new” classification would apply to current and subsequent annual increments and would not be applied retroactively.

Clarification for Campuses Electing Depreciation Methods 3A, 3B and 4

The following clarification applies to campuses that have elected depreciation methods 3B (survey building sample to establish a weighted average useful life for buildings within a classification) or 4 (survey all buildings within a classification to determine the weighted average useful life for each building):

- For individually surveyed buildings (Methods 3A, 3B, and 4), campuses should:
 - Once a building becomes a “surveyed” building, all subsequent increments for each building must also be “surveyed.” The life determined for the increment should be applied only to that new increment.
- For non- surveyed “laboratory” buildings using the weighted average useful life of surveyed buildings (Method 3B), campuses may:
 - Continue to use the weighted average useful life established by the original surveys for all subsequent increments; or
 - Choose to survey an increment. If a campus chooses to survey an increment in a previously non-surveyed building, then all future increments must be surveyed and assigned a specific useful life. In this case, the building becomes a “surveyed” building for all prospective increments. All historical costs will continue to be depreciated over the original weighted average useful life.

Example—

- In FY 2001, the campus determines the weighted average useful life assigned for all non-surveyed “laboratory” buildings is 27 years.
- In FY 2003, a major addition is made to a non-surveyed building. The campus chooses to analyze/survey the increment and determines the useful life is 20 years for that increment. In effect, the building must prospectively be considered a surveyed building and all subsequent increments must be analyzed/surveyed.

- In FY 2004, a renovation is made to a surveyed “laboratory” building. Because the building was previously surveyed, the renovation must be analyzed/surveyed and assigned a specific useful life.
- In FY 2005, modifications are made to a previously non-surveyed “laboratory” building. The modification is not significant and the campus chooses to depreciate the increment using the weighted average useful life of 27 years. There is no change to the 27 year weighted average useful life.

Leasehold Improvements

- Leasehold improvements should be assigned capital asset account numbers (CAAN) for each leased building (not for each leasehold improvement in each leased building).
- Campuses will be required to establish the useful life for each CAAN based on the shorter of the following criteria:
 - the life of the improvement,
 - the weighted average useful life of the improvements (multiple improvement projects),
 - the life of the lease,
 - the weighed average lease life if there are several leases associated with a CAAN, or
 - the default useful life for “other” buildings (the current placeholder is 32 years).
- Campuses shall apply the same criteria listed above to determine the useful life for each year there is an increment to a leased building.

Next Steps—Required Actions

- Campuses must review and approve the list of laboratory buildings by January 15, 2001.
- Campuses that have elected Methods 3A, 3B, or 4 should be compiling useful life data for the “laboratory” buildings listed in the attachments.
- OP will provide electronic files for campuses to complete for surveyed buildings.
- OP will provide file format for campuses to complete for assigning useful lives to leasehold improvements.
