Students

# Grading — The Necessary (?) Evil

*“I definitely decided to pursue a career that involves teaching because I really love grading and assigning letter grades.”*

-- No one, ever

**Grading does not motivate students**

**Norm-referenced grading (curving) forces competition**

**Norm-referenced grading (curving) can push out students from marginalized groups**

**Points-based grading leads to focus on points instead of learning**

**Grade is bestowed by instructor instead of earned**

# Teaching Philosophy / Grading Practice

## What I Said I Valued

- Learning is collaborative
- Mistakes lead to learning
- Growth mindset
- Transparency

## What Grading System Said

- Compete for grades
- No room for mistakes
- No opportunities to show improvement
- Never know where you stand

HELLO  
my name is

*HYPOCRITE*

# Grade-Related Interactions

Excerpts from thousands of emails I have received from students (and you probably have, too):

*I worked very hard in this class and I do not feel my grade reflects the effort I put in.*

*I'm only a few points away from the next grade. Can you round my grade up? Can I do some extra credit?*

*My answer was at least partially correct, so I think I deserve more points for this. I need more points so that I can have a higher grade for med school.*

*It's not fair that I have more points than my friend in a different section but they have a higher grade.*

**We have conditioned students to treat grades and points this way.**

# Down the Grading Rabbit Hole

Contract Grading

Mastery Learning

Standards-Based  
Grading

Buy-In

Token Economy

Grade Bundles

# Grade Bundles

# Common Grade Bundle Configurations

## Core & Advanced Objectives

- Course objectives divided
- Pass all essential objectives for passing grade
- More general objectives = higher grade

## Objectives Organized by Modules

- Objectives organized into module “bins”
- 1 or more essential modules
- Higher grades = pass more modules

## All Equal Objectives

- Course objectives may be divided
- More objectives = higher grade

# Core & Advanced Objectives

## Organic Chemistry I (Ring)

- A: Pass 6 EOs + 15-16 GOs  
 A- : Pass 6 EOs + 14 GOs  
 B+: Pass 6 EOs + 13 GOs  
 B: Pass 6 EOs + 11-12 GOs  
 B-: Pass 6 EOs + 10 GOs  
 C+: Pass 6 EOs + 9 GOs  
 C: Pass 6 EOs + 7-8 GOs  
 C-: Pass 6 EOs + 6 GOs  
 D+: Pass 6 EOs + 5 GOs  
 D: Pass 6 EOs + 3-4 GOs  
 D-: Pass 6 EOs + 2 GOs  
 F: Pass less than 6 Eos and/or 2 GOs

## Discrete Math (Carlisle)

Table 2. Grade benchmarks in Disco

Course grade	A	B
Worksheets	Pass all but 1	Pass all but 2
Problems: Core	Pass all 6	Pass all 6
Problems: Adv.	Pass 5	Pass 3
Final exam (%)	85	75
Course grade	C	D
Worksheets	Pass all but 3	Pass all but 4
Problems: Core	Pass all 6	Pass 5
Problems: Adv.	Pass 1	Pass 0
Final exam (%)	65	55

# Core & Advanced Objectives

## Thermodynamics (Mendez)

Table 1: Course Grade Requirements

	D	C	B	A
<b>Quizzes</b>	Earn passing scores (E or M) on 15 core learning targets.	Earn passing scores (E or M) on all 18 core learning targets.	Earn passing scores (E or M) on all 18 core learning targets PLUS 7 additional learning targets.	Earn passing scores (E or M) on all 18 core learning targets PLUS 14 additional learning targets.
<b>Quiz "E" Scores</b>	None required.	None required.	Earn "E" scores on 18 learning targets.	Earn "E" scores on 25 learning targets.
<b>Design Project</b>	None required.	Earn passing score (E or M) on report. No presentation required.	Earn passing scores (E or M) on report AND presentation.	Earn passing scores (E or M) on report AND presentation. Earn "E" score on report OR presentation.
<b>Pre-Class Work</b>	Pass 7 pre-class assignments.	Pass 8 pre-class assignments.	Pass 10 pre-class assignments.	Pass 11 pre-class assignments.

## Organic Chemistry I (Link)

### A

- Pass 7/8 HLO Quizzes
- Pass 8/8 ELO Quizzes
- Pass 8/8 ELO ReQuizzes

### B

- Pass 4/8 HLO Quizzes
- Pass 8/8 ELO Quizzes
- Pass 8/8 ELO ReQuizzes

### C

- Pass 8/8 ELO Quizzes
- Pass 8/8 ELO ReQuizzes

### D

- Pass 4/8 ELO Quizzes & ReQuizzes (any combo)

### Plus (+)\*

- Sapling total  $\geq 80\%$
- Group activities  $\geq 10/15$
- Weekly reflections/maps  $\geq 4$

### Minus (-)

- Sapling total  $\leq 70\%$
- Group activities  $\leq 8/15$
- Weekly reflections/maps  $\leq 2$

# All Equal Objectives

## Thermodynamics (Mendez)

Table 2: Course Grade Requirements

To earn this grade:	Accomplish the following:
<b>A</b>	Earn passing scores on 15 quizzes, including at least 11 "E" scores, AND earn passing scores on project report and presentation.
<b>B</b>	Earn passing scores on 13 quizzes, including at least 7 "E" scores, AND earn passing scores on project report and presentation.
<b>C</b>	Earn passing scores on 11 quizzes (no "E" scores required), AND earn passing scores on project report and presentation.
<b>D</b>	Earn passing scores on 9 quizzes (no "E" scores required).

# All Equal Objectives

## Differential Equations (Carlisle)

**Table 1.** Grade benchmarks in DE II

Course grade	A	B
Online homework (%)	85	80
Worksheets	Pass all but 1	Pass all but 2
Problems (of 20)	Pass 20	Pass 17
Projects	Pass 2	Pass 1
Final exam (%)	85	75
Course grade	C	D
Online homework (%)	75	70
Worksheets	Pass all but 3	Pass all but 4
Problems (of 20)	Pass 14	Pass 12
Projects	Pass 0	Pass 0
Final exam (%)	65	55

# Objectives Organized by Module

## Calculus II (Tsoi, et. al.)

Course grade	Requirement
A	Pass essential module 1 and 5 general modules, student choice
B	Pass essential module 1 and 4 general modules, student choice
C	Pass essential module 1 and 3 general modules, student choice
D	Pass essential module 1 and 2 general modules, student choice
F	[Do not pass essential module 1] or [pass essential module 1 and (1 or none of the general modules, student choice)]

# Common Specifications Grading Types

## Core & Advanced Objectives

- Course objectives divided
- Pass all essential objectives for passing grade
- More general objectives = higher grade

## Objectives Organized by Modules

- Objectives organized into module “bins”
- 1 or more essential modules
- Higher grades = pass more modules

## All Equal Objectives

- Course objectives may be divided
- More objectives = higher grade

## Equal Objectives with Repetition & Difficulty

- Course objectives met through multiple means
- More repetitions & higher-order assessments = higher grade

# Objectives with Repetition & Difficulty

## Organic Chemistry Laboratory (Howitz)

### A

- Pass 6/7 ELN assignments
- Pass 4/5 Post-Labs Reports
- Pass 3/3 Technique Video Assessments
- Pass Knowledge Check/Safety
- Pass Proficiency Exam at A level

### B

- Pass 5/7 ELN assignments
- Pass 3/5 Post-Labs Reports
- Pass 2/3 Technique Video Assessments
- Pass Knowledge Check/Safety
- Pass Proficiency Exam at B level

### C

- Pass 4/7 ELN assignments
- Pass 1/5 Post-Labs Reports
- Pass 1/3 Technique Video Assessments
- Pass Knowledge Check/Safety

### D

- Pass 3/7 ELN assignments

# Objectives with Repetition & Difficulty

## Writing for Chemists (McKnelly)

**MINIMUM To Earn C** (fulfills the upper division writing requirement)

<b>Small Writing Assignments (19 total):</b> 12 high-passes <input type="checkbox"/> + no unsatisfactory <input type="checkbox"/>
<b>1000-Word Writing Assignments (4 total):</b> 3 high-passes <input type="checkbox"/> + no unsatisfactory <input type="checkbox"/>
<b>Presentations (5 total):</b> 3 low-passes <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>Presentation Participation:</b> 3 Satisfactory Required <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>Lecture Participation:</b> 2 Required <input type="checkbox"/> <input type="checkbox"/>
<b>Reading Completion (17 total):</b> 13 completed <input type="checkbox"/>
<b>Complete/Incomplete Assignment Completion (17 total):</b> 15 completed <input type="checkbox"/>
<b>Final Presentation:</b> low-pass <input type="checkbox"/>
<b>Final Paper:</b> low-pass <input type="checkbox"/>

**MINIMUM To Earn A-**

<b>Small Writing Assignments (19 total):</b> 17 high-passes <input type="checkbox"/> + no unsatisfactory <input type="checkbox"/>
<b>1000-Word Writing Assignments (4 total):</b> 3 high-passes <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> + 1 low-pass <input type="checkbox"/>
<b>Presentations (5 total):</b> 2 with high-passes <input type="checkbox"/> <input type="checkbox"/> + 2 low-passes <input type="checkbox"/> <input type="checkbox"/>
<b>Presentation Participation:</b> 4 Satisfactory Required <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>Lecture Participation:</b> 5 Required <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>Reading Completion (17 total):</b> 16 completed <input type="checkbox"/>
<b>Complete/Incomplete Assignment Completion (17 total):</b> 15 completed <input type="checkbox"/>
<b>Final Presentation:</b> high-pass <input type="checkbox"/>
<b>Final Paper:</b> high-pass <input type="checkbox"/>

# Rubrics & Specifications

# Assessment Specifications

## Pass/No Pass

- Binary rubric items
- Passing threshold set
- Must meet minimum threshold to pass assessment
- No partial credit

## High Pass/Low Pass/ No Pass

- Binary rubric items
- Two passing thresholds set
- Must meet minimum threshold to pass assessment at high or low levels
- No partial credit

## Multi-level Rubrics/ Thresholds

- Rubrics may be binary or multi-level
- Assessments marked according to level met (E, M, R, N)

## Points with Passing Threshold

- Traditional points-based rubric
- Minimum passing threshold for credit/desired letter grade
- Partial credit varies

# Specifications Grading Requires Carefully Designed Rubrics...

Criteria from Points-Based Rubric	Points	
<b>Theory (Full Credit):</b> Student discusses fundamentals of column chromatography and relates the technique to TLC, noting similarities and differences and how a successful separation is achieved.	7	
Criteria from Specifications Rubric	Satisfactory	Needs Revision
<b>Theory 1a:</b> Clearly describes the chemical principle(s) that govern how compounds are separated using column chromatography. Note: Be sure to include the importance of solvent choice.	<input type="checkbox"/>	<input type="checkbox"/>
<b>Theory 1b:</b> Clearly compares and contrasts column chromatography to TLC.	<input type="checkbox"/>	<input type="checkbox"/>
<b>Theory 1c:</b> Clearly describes what procedural steps must be taken to achieve a successful separation using column chromatography.	<input type="checkbox"/>	<input type="checkbox"/>
<b>Theory 1d:</b> Clearly explains how separation is monitored in real time, and how this allows the determination of whether the separation was successful or not.	<input type="checkbox"/>	<input type="checkbox"/>

# Revise/Resubmit/Reassess & Token Economy

# Managing Retakes and Revisions with a Token Economy

Use tokens to incentive good habits

- Planning
- Study habits
- Metacognitive strategies

Tokens remove the need for instructor to judge student situations and requests.

## Chem 51L Token Trade-In Request Form

Use this form to request token use for Chem 51L classes. Be sure to check your token balance on Canvas! If you have used a token recently and your balance has not changed on Canvas yet, you are still responsible for knowing and being honest about your accurate

# Outcomes & Potential Benefits

# Gains in Specific Assessments

<b>Organic Chemistry (Ring)</b>	<b>Fall 2014, including partial credit (n=46)</b>	<b>Fall 2014, regraded without partial credit</b>	<b>Fall 2015, no partial credit given (n=35)</b>
<b>Final Exam Average</b>	65.6%	41.4%	61.3%
<b>Lewis/LA/CF</b>	63.7%	28.5%	67.8%
<b>Naming</b>	71.9%	24.7%	61.0%
<b>Resonance</b>	67.8%	39.6%	63.5%
<b>Acid-Base Explanations</b>	68.3%	48.1%	50.5%
<b>A + B → ?</b>	61.9%	49.4%	62.0%
<b>A + ? → C</b>	61.0%	42.9%	72.5%

# Gains in Specific Assessments

## Discrete Math (Carlisle)

	Final Exam Mean	Final Exam Median
Term 1	74.5	73.83
Term 2	77.6	78.33
Term 3	83.67	86.67
Term 4	83.43	86
Term 5	83.46	85

Carlisle, S. *Problems, Resources, and Issues in Mathematics Undergraduate Studies 2020*, 30 (8-10), 926–951.

## Thermodynamics Hybrid (Mendez)

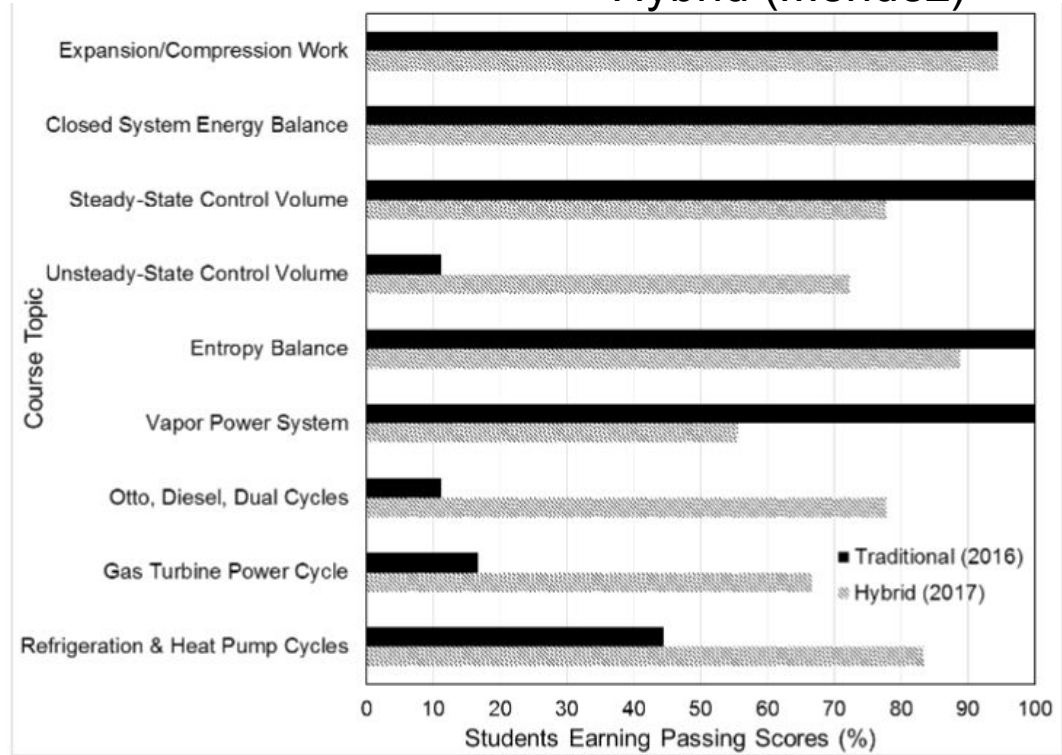

Figure 1. Student performance on course assessments in the traditional (solid bars) and hybrid (dashed bars) classes. In the hybrid class, these quizzes were proctored and took place in class.

# Gains in Letter Grades

Discrete Math  
(Carlisle)

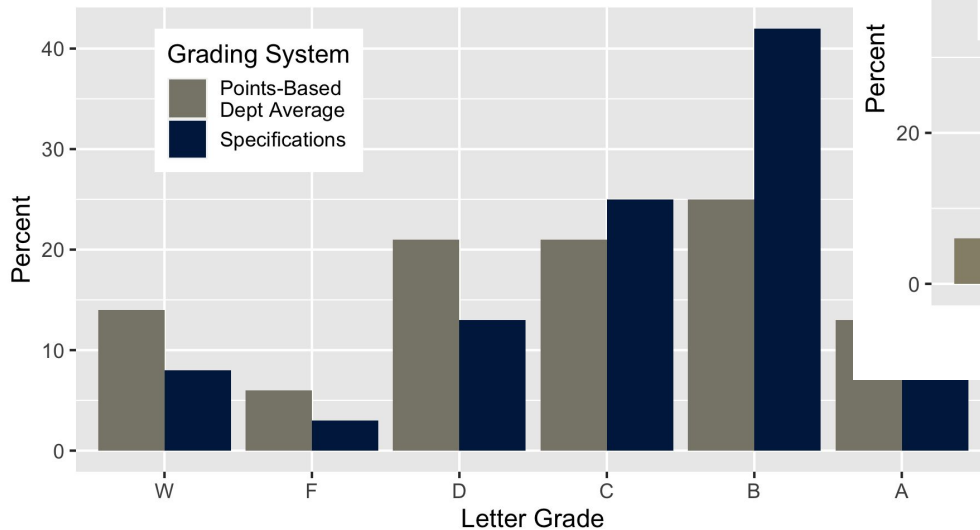

**Table 3.** Percentage of students with each course grade

Disco	Point system		Specs system		
	Term 1 <i>n</i> = 24	Term 2 <i>n</i> = 21	Term 3 <i>n</i> = 19	Term 4 <i>n</i> = 23	Term 5 <i>n</i> = 21
Grade					
A	16.7	23.8	52.6	43.5	66.7
B+	20.8	19	15.8	21.7	9.5
B	25	28.6	5.3	8.7	0
C+	8.3	9.5	21	4.3	9.5
C	16.7	14.3	0	4.3	4.8
D+	0	4.8	0	4.3	0
D	8.3	0	0	0	4.8
F	4.2	0	5.3	13	4.8

# Gains in Letter Grades

## Letter Grades in General Chemistry I

Data from Toledo & Dubas 2017

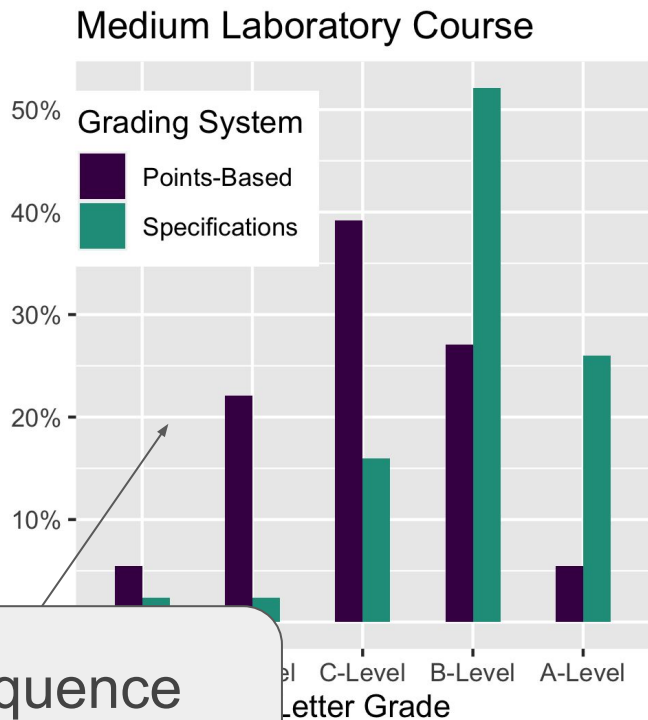

## Letter Grades in General Chemistry

Data from Hollinsed 2018

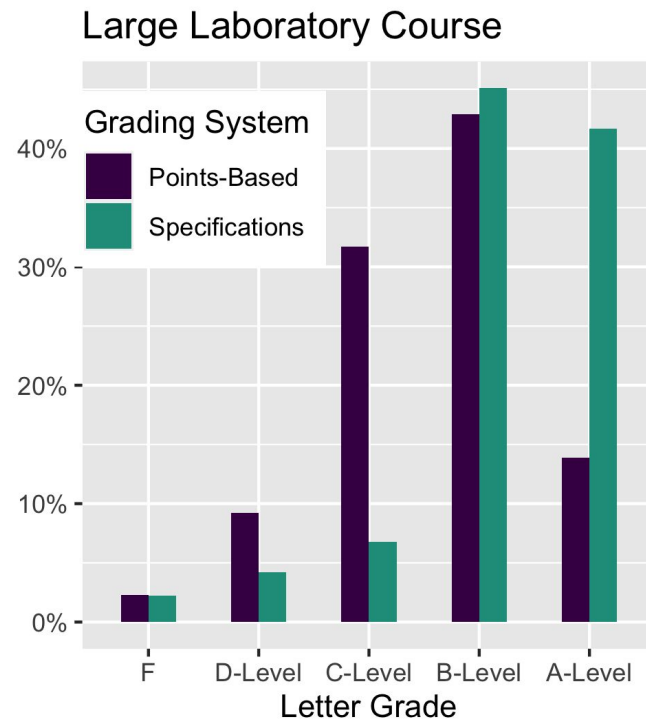

Hollinsed, W. C. Applying Innovations in Teaching to General Chemistry. In *Increasing Retention of Under-Represented Students in STEM through Affective and Cognitive Interventions*; ACS Symposium Series; 2018; Vol. 1301, pp 145–152.

# Organic Chemistry Lab Grades

Off-sequence  
course

# Relationship Shifts for Student & Instructors

*Grading system  
matches teaching  
philosophy*

*Make mistakes and try  
again*

*Conversations are  
about content, not  
points*

*Peers are  
collaborators, not  
competitors*

# Positive Change

*“...your class and the way it was structured alleviated the stress of an online lab course by a significant margin.... [the] grading scale; it's unlike anything I've personally encountered, and I think it focuses on what school is all about—learning, even if it's from mistakes. I think that our society has been brainwashed into expecting perfection, when really we should be aiming for a higher understanding of a subject from the mistakes we make and remember instead of the short-term comprehension that comes from doing something correctly the first try... I wish [it] would be implemented in other courses...*

*...I wasn't 'stupid' in your course—I felt more like I was growing and on my way to proficiency and understanding..”*                      *Angelina Phu, UCI Student*

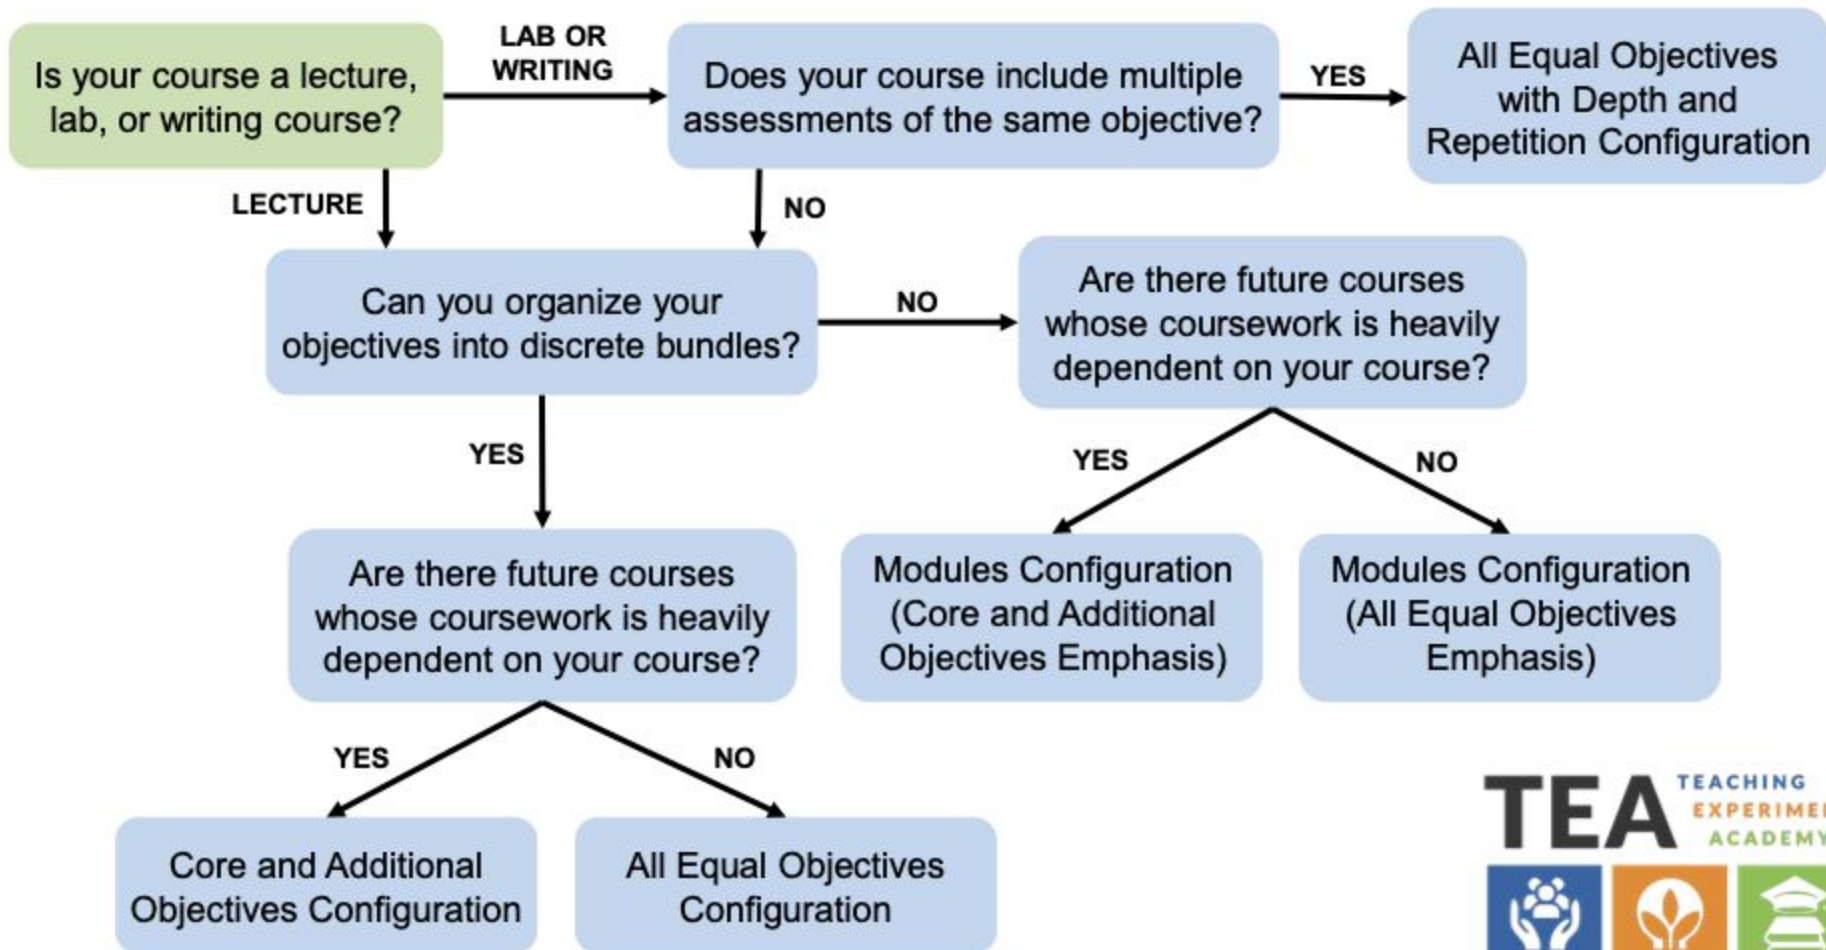

# We Don't Have to Grade the Way We Were Graded

*Students appreciate transparent, non-competitive grading that allows for learning from mistakes.*

*Learning and letter grade gains in supportive environment.*

*Specifications grading can work at scale.*

# Additional Slides That Might Help

# Limited Time to Grade

Approach Revision / Resubmission / Reassessment Strategically

Autograding (LMS)?

Complete / Incomplete?

Peer- / Self-Grading?

Reassessed?

Revise/Resubmit?

Tokens?

# How Long Did TAs Spend Grading?

Comparison of self-reported TA grading time in a points-based course and specifications grading system (including revise & resubmit grading).

<b>Median</b>	5	5		7	7
<b>StDev</b>	0.46	0.83		0.91	0.96

# Earn & Trade Token Examples

## 1 Token

- Revise and resubmit a “Needs Revision” post-lab within 72 hours after graded work is returned.
- 24 hour late pass
  - May use multiple tokens for additional 24 hour passed on a single assignment

## 2 Tokens

- Replace 1 Needs Revision on lab notebook assignment

## 3 Tokens

- Make-up lab (no reason needed)
- Buy out 1 student choice technique on exam

## Extra may be earned for:

- Completing 3 surveys in the class
- Whole section 4 consecutive weeks of no waste/safety issues
- Metacognitive activities

# Managing Retakes and Revisions with a Token Economy

## Student

**Step 1.** Submit reflection assignment.

**Step 2.** Earn 4 initial tokens.

**Step 3.** Track token balance through assignment “score” on LMS.

**Step 4.** Review token trade-in list.

**Step 5.** Fill out token trade-in Google form.

Google Forms

**Step 6.** Receive copy of their response.

**Step 7.** Forward copy to TA.

## Instructor

**Step 8.** Subtracts tokens used from LMS token balance.

# Start with Student Learning Outcomes (SLOs)

## Initial SLOs

66 Total SLOs

## Categorized SLOs

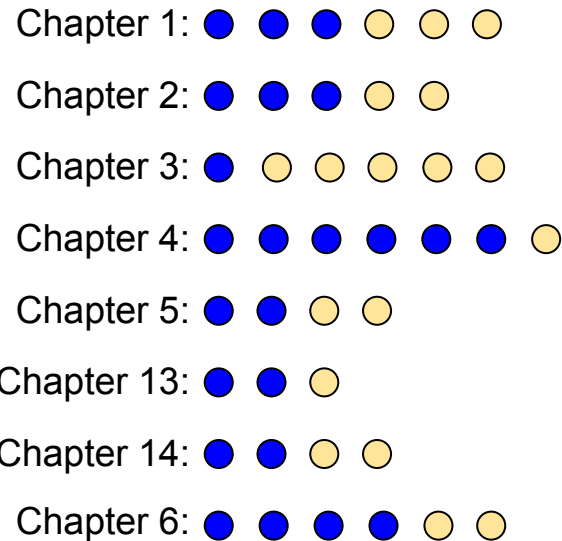

40 ELOs  
&  
26 HLOs

## Consolidated SLOs

24 ELOs  
&  
18 HLOs

● **ELOs:** essential LOs  
● **HLOs:** higher level LOs

# Examples of Consolidated SLOs

## Initial SLOs

- Identify acids and bases
- Determine relative acidity using  $pK_a$
- Determine relative basicity using  $pK_a$

## Consolidated SLOs

Use structures and  $pK_a$  values to identify acids/bases.

- Determine relative acidity using structure
- Determine relative basicity using structure

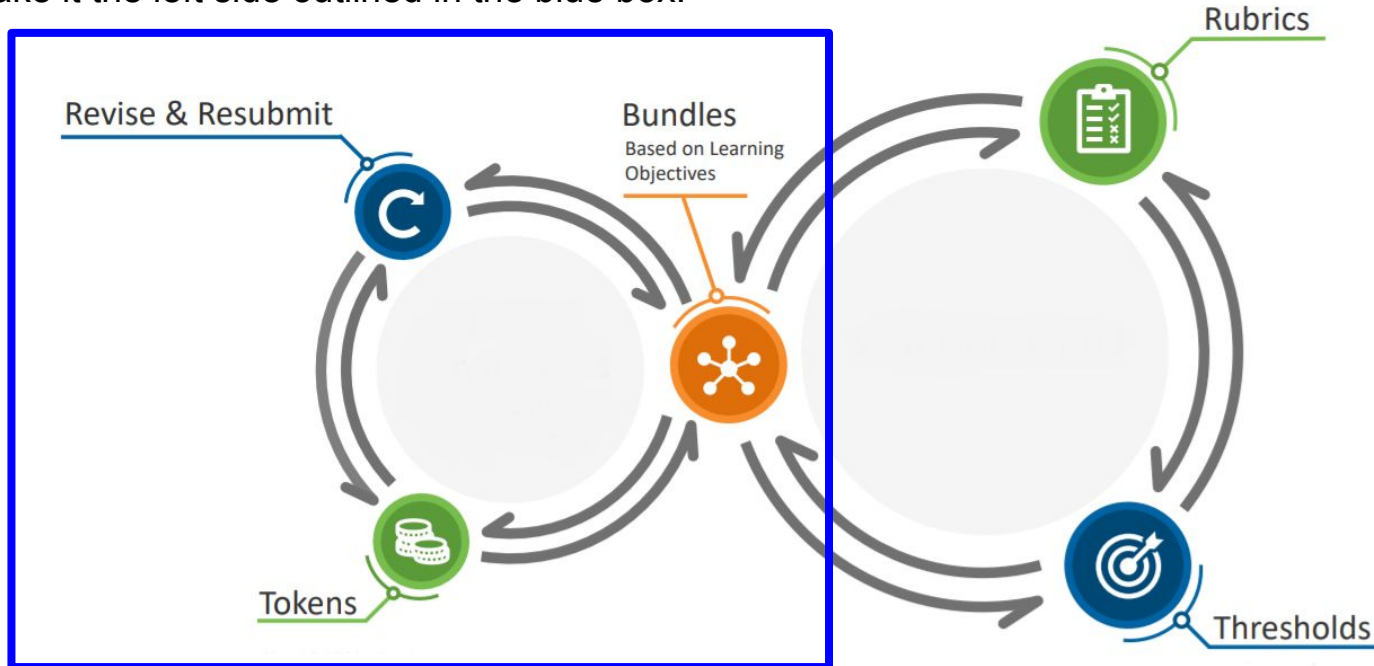

Use structure to determine relative acidity or basicity.

You probably have too many. Consolidate where you can.

- **ELOs:** essential LOs
- **HLOs:** higher level LOs

# Relationships between the Elements of Specifications Grading

If you only incorporate parts of the system, make it the left side outlined in the blue box!
